history is generally defined as the study of past events particularly in human affairs and is mostly understood when presented chronologically that s why someone also defined it as the chronological record of the past knowing the past is extremely important for any society and human being past gives us insights into our evolving behavior in many matters of life the book is seen as a unique opportunity to preserve the memory of the italian history of soil science it represents a milestone and a cultural heritage moreover the book is a sort of ideal bridge between the pioneers of soil

science in Italy and the young generation of researchers contributing to spreading awareness of the importance of soil as a fundamental resource

desertification includes land degradation due to both climatic and anthropogenic causes where land includes water, soil, and the biosphere. This book presents the most recent findings from the European Community's MEDALUS project, which was formed to understand and manage semi-arid environments that are undergoing great change. It covers climate and land use processes and responses in the Mediterranean. This is the first book to provide guidelines for the management of land degradation in Mediterranean environments based on first-hand experience of the problems by those responsible for solving them.
